

SEP 27 2001

Dear Carol Hanlon,

1 [How can the Secretary of Energy be preparing to recommend Yucca
Mountain for a high-level nuclear waste dump when thousands of
2 public comments on the Draft Environmental Impact Statement have
not been addressed?] Without a Final Environmental Impact
Statement, a detailed transportation scenario or a licensing rule, the
Department of Energy lacks the basis for consideration of site suit-
ability. The public cannot have confidence in any recommendation
3 that arises from such a dramatically flawed process. I urge you to
abandon the Yucca Mountain project.]

Sincerely,

[YOUR NAME]

[YOUR ADDRESS]
